BUSINESS EASTER

FOR STRUCTURAL STEEL INDICATES BOOM.

New York, April 3.-Bradstreet's tomor-

ade, crop and industrial reports are very irregular, but the underlying of business generally is slightly more mistic. Some lines of industry are yery much depressed. The first crop ort of the year—that made by the govnent on winter wheat—is a poor one, ating a short crop; that buying is till hampered in some sections by un-layerable weather or by the reduced pur-hasing power of the public, and that aution and conservatism still govern commercial operations to a large degree. Easter trade at retail is classed as fair mercial operations to a large degree. ister trade at retail is classed as fair rood in most parts of the west, fair he east, but below expectations at the h, and rather poor in Texas, where ight conditions hold back buying design to the conditions are conditions. and. Some slight expansion is noted in distinctively of a between-seasons Des Moines r fall. The cotton yarn markets seem Sioux City show signs of improvement and export Norfolk for in cottons is slightly better. By Grand Rapi erses of products women's wear goods em most active, but the automobile ade, paradoxically enough, returns one e best reports of any single indus-in purely industrial lines the buildg frades return very good reports, and a enormous volume of work is planned or the coming spring and summer. The sum and steel and coke trades are all their depressed, and most activity is steel in structural shapes of steel, premably at the expense of prices.

Dun's Review.

R. G. Dun & Co.'s Weekly Review of Akron Trade tomorrow will say:
Although confidence in the future is
more noticeable than satisfaction with present conditions, yet one by one discrebing elements are gradually disappearing. While the tariff is still under discussion and is checking full activity in adustries most concerned, yet the reports from most of the cities show their rade to be in a fairly satisfactory state. Centers farthest removed from the industrial activity are naturally making the best exhibits, while the iron and steel trade is still in the unsettled process of readjustment, yet it makes the best showing the exactly that line—the structural—which is a sign of building activity. In the primary cotton goods market the most interesting feature of the week has been the activity in wide convertibles of print cloth, yarn, converters and cutters now showing for the first time a disposition to operate freely, while manufacturity as a rule, are reluctant to make conon to operate freely, while maintactor is, as a rule, are reluctant to make contacts except at a material advance.
